

Sergio Asensio

I am Sergio Asensio, a Technical Lead and Software Architect with a Bachelor's Degree in Mathematics from the University of Zaragoza and more than 10 years of experience delivering software solutions across environmental monitoring, industrial IoT, healthcare, public administration, and digital transformation projects.

Over the last few years, I have specialized in the water and environmental sectors, leading projects and multidisciplinary teams throughout the entire software lifecycle, from requirements discovery and architecture design to deployment and long-term product evolution. I act as a bridge between business stakeholders, clients, and technical teams, helping transform complex requirements into scalable, maintainable, and high-value software solutions.

Throughout my career, I have worked on web and mobile applications, data platforms, and IoT systems using technologies such as Java, Angular, React, Flutter, Node.js, Python, Salesforce, and ThingsBoard. My experience also includes software architecture, systems integration, data modeling, CI/CD practices, containerization, and cloud-native deployments.

Beyond technology, I enjoy solving complex problems, understanding new domains, and building strong foundations that allow products and teams to grow sustainably over time. I am passionate about software quality, engineering best practices, continuous improvement, and helping teams deliver reliable solutions while fostering collaboration, autonomy, and knowledge sharing.

EDUCATION

2011 – 2016

BSc in Mathematics – University of Zaragoza

LANGUAGES

Spanish

Native

English

Speaking and writing Upper Intermediate level

SOFTWARE TOOLS

Backend

Java, Spring MVC, Spring Boot, Hibernate, JPA, Node.js, Express.js, Python, PHP, Ruby on Rails

Frontend

Angular, NgRx, React, TypeScript, JavaScript, HTML, CSS, SCSS, JSP, JSPX, Bootstrap, Angular Material

Mobile

Flutter, Dart, BLoC, SQflite, Google Maps Integration

Platforms and IoT

Salesforce, ThingsBoard, Redmine, Marketing Cloud

Databases

PostgreSQL, TimescaleDB, Oracle, MySQL, SQL

ETL

Talend Open Studio

Cloud, DevOps and CI/CD

Docker, Docker Compose, OpenShift, Azure, Azure Functions, Heroku, ElliotCloud, GitLab CI

Integrations

REST, SOAP, Apprise, Email, Telegram, Twitter, Firebase Cloud Messaging, SMS platforms

Security

Keycloak, LDAP, OAuth 2.0, OpenID Connect, JWT, SSO, RBAC, CORS, user management, access control, permission configuration, API security

IDEs

IntelliJ IDEA, Visual Studio Code, Eclipse

Version Control

Git, SVN, CVS

Repositories

GitHub, GitLab, Bitbucket

Project Management

Jira, Redmine

Methodologies and

Scrum, Kanban, Gitflow, Pull Requests, code review, Clean Code, SOLID, testing, roadmaps, technical documentation

Technical Quality

WORK EXPERIENCE

Nov 2021 – Present

TECHNICAL LEAD – Adasa Sistemas

Current professional experience focused on technical leadership, software architecture, project delivery, and coordination of development teams in projects related to water, environment, telemetry, monitoring, meteorology, document management, and public administration.

Responsible for defining technical solutions, supporting requirements analysis, coordinating development activities, making key design decisions, reviewing code, preparing technical documentation, and ensuring that the delivered solutions are maintainable, scalable, and aligned with client needs.

Main technologies: Angular, Node.js, Flutter, Python, PHP, PostgreSQL, TimescaleDB, ThingsBoard, Docker, OpenShift, Azure, GitLab CI/CD, Keycloak and Talend.

April 2020 – Nov 2021

SENIOR ANALYST DEVELOPER – UST Global

Worked on the development of a hospital software solution, contributing to the estimation, implementation, and demonstration of new modules requested by the client.

Also contributed to front-end and back-end architecture improvements, pull request reviews, knowledge transfer, and collaborative development within the team.

Main technologies: Angular, NgRx, Node.js, TypeORM, PostgreSQL, Azure.

May 2019 – April 2020

ANALYST DEVELOPER – Grupo Oesia

Worked as a technical analyst on a waste management project for the Government of Aragon, focusing on the definition and implementation of new modules, the evolution of the solution architecture, and support to the development team.

Responsibilities included the design and implementation of front-end and back-end functionalities, as well as knowledge transfer and technical support for other developers.

Main technologies: Angular 8, Java, Spring Boot, JPA, Oracle, Docker.

March 2018 – May 2019

SENIOR FULL STACK DEVELOPER – Grupo Oesia

Developed several Angular modules and Java REST services for an environmental quality and waste management system used in public administration contexts.

Also took sole responsibility for a client-facing project, managing the maintenance and functional evolution of Zaragoza City Council's personnel management application.

Main technologies: Angular 7, Java, Spring Boot, JPA, REST services, PrimeFaces, JSPX, SQL, Oracle, Docker.

Feb 2017 – March 2018

FULL STACK DEVELOPER – DxD Applications & IT Solutions

Worked on Salesforce, Java, Node.js, Angular, Heroku, and integration projects, taking part in both development and maintenance activities across different business domains.

Responsibilities included structuring and developing Apex code, building Visualforce pages, implementing workflows, developing REST integrations, creating test classes, and maintaining Salesforce-based solutions.

Also contributed to the development and deployment of Node.js and Java services on Heroku, including SMS delivery solutions integrated with Marketing Cloud, Salesforce, Talend, and external SMS platforms.

Main technologies: Salesforce, Apex, Visualforce, Java, Node.js, Angular, REST services, Heroku, PostgreSQL, Marketing Cloud, Talend Open Studio.

March 2016 – Feb 2017

JUNIOR FULL STACK DEVELOPER – DxD Applications & IT Solutions

I started my professional career through training and participation in software projects involving SAP ABAP, Java, Salesforce, and web development.

Worked on Salesforce maintenance projects and contributed as a full stack developer to an energy sector project focused on building a Java web application that replicated selected Salesforce functionalities.

This stage provided a strong foundation in full stack development, web technologies, REST services, databases, Heroku deployments, Salesforce integration, and ETL processes.

Main technologies: Java, Spring MVC, Hibernate, HTML, CSS, jQuery, JSP, JavaScript, SQL, REST, AJAX, Salesforce, Heroku, Talend Open Studio.

COURSES

March 2016	SAP Training Course, ABAP track
April 2016	Java Training Course
April 2016	Salesforce Training Course
April 2018	Angular Training Course

PRESENTATIONS AND CONTRIBUTIONS

October 2016	Salesforce Course Instructor
October 2017	Java Course Instructor
	Creation of reusable starter code templates to accelerate project kick-off and improve technical consistency.
	Development of internal video tutorials and training materials to strengthen the team's technical capabilities.

CERTIFICATIONS

Java Standard Edition 6 Programmer Certified Professional (Score: 93%)
AZ-204 Exam: Developing Solutions for Microsoft Azure
